

# Conventional Surface Grinders **HFS 4080 F Advance**

#### SKU: 124933

The HFS F Advanced series is the latest development of our tried and tested surface grinding machines, which have proven themselves in many companies for decades. Although surface grinding is a widespread machining process, the machines in this series with their extensive standard accessories set a high standard as a turnkey solution. The advanced operating functions implemented with Siemens technology are new. These machines are the best choice for customers for whom conventional is too little and CNC is too much.

- Magnetic clamping plate with builtin demagnetizing function
- Vertical axis with ballscrew and servo motor for high precision
- Easy auto-mode programming with Siemens PLC and touchscreen
- Extensive standard equipment package

### **TECHNICAL SPECS**

# **WORKING AREA**

| Workpiece weight (max.)                | 500 kg             |
|--|--------------------|
| Table dimensions                       | 813 mm x 406 mm    |
| Spindle nose-to-table surface distance | 580 mm             |
| Dimensions magnetic clamping plate     | 800 mm x 400 mm    |
| Scale ring division Y-axis             | 0.005 mm           |
| Scale ring division Z-axis             | 0.02 mm            |
| Autom. transverse feed Z-axis          | 0.1 mm - 8 mm      |
| Speed                                  | 1450 1/min         |
| Autom. vertical feed                   | 0.005 mm - 0.05 mm |
|  |                    |

#### **TRAVELS**

| Travel X-axis | 910 mm |
|---------------|--------|
| Travel Y-axis | 450 mm |

#### **FEED**

| Hydr. feed X-axis | 7 m/min - 23 m/min |
|-------------------|--------------------|
| Rapid feed Y-axis | 480 mm/min         |
| Rapid feed Z-axis | 990 mm/min         |
|                   |                    |

## **DRIVE CAPACITY**

| Motor rating main drive 4 |
|---------------------------|
|---------------------------|

#### **MEASURES AND WEIGHTS**

| Grinding wheel<br>dimensions                    | 350 mm x 40 mm x 127<br>mm |
|---|----------------------------|
| Overall dimensions<br>(length x width x height) | 3.6 m x 2.4 m x 1.9 m      |
| Weight  | 3400 kg                    |

If set to Auto mode, the user-defined roughing and finishing parameters, number of spark-out strokes, and return to zero are automatically processed

#### **PRODUCT DETAILS**

- The cast-iron machine frame features superior rigidity and torsional strength, precision guideways and excellent machining quality
- All guideways are lubricated reliably via a central lubrication system
- The workspace is protected by an easily accessible enclosure
- A powerful coolant pump is combined with a vacuum exhaust unit to clear grinding dust and aerosol during machining operations
- All required parameters for precise grinding spindle feeds are entered and edited via the Siemens touchscreen
- The high-quality preloaded ball screw and a powerful servo-motor ensure high precision and repeatability of positioning on the Y-axis
- The machine features an electronic hand-wheel for configuration tasks and manual movement of the grinding spindle
- If set to Auto mode, the user-defined roughing and finishing parameters, number of spark-out strokes, and return to zero are automatically processed

#### **Grinding spindle**

- Large grinding spindle, dynamically balanced, completely sealed with permanent lubrication
- Preloaded precision-bearings ensure maximum grinding performance and high reliability over many production hours

#### **Programming**

- The high-quality preloaded ball screw and a powerful servo-motor ensure high precision and repeatability of positioning on the Y -axis
- The machine features an electronic hand-wheel for configuration tasks and manual movement of the grinding spindle
- If set to Auto mode, the user-defined roughing and finishing parameters, number of spark-out strokes, and return to zero are automatically processed

#### **Hydraulics**

- Extremely quiet operation and minimal heat build-up for optimum work results under continuous operating conditions
- Hydraulically operated linear table movement, infinitely variable, high consistency, and soft reversal of direction
- External hydraulic unit with oil cooler unit ensures perfect temperature stability

#### Magnetic clamping plate

- A large magnetic setup plate is included and ensures torsion-free clamping, long tool life and high reliability
- The control unit is integrated into the electric system to simplify operation, allowing quick clamping and degaussing for maximum production efficiency

# STANDARD EQUIPMENT

2-axis position indicator X.Pos 3.2 Electronic hand-wheel Grinding wheel flange Automatic central lubrication Workspace enclosure Coolant and suction device Grinding wheel dresser Balancing station Balancing shaft LED work lamp Magnetic clamping plate Adjustment screws Operating tools Demagnetization unit Siemens PLC-control with Touchscreen Operator manual Grinding wheel

# **OPTIONAL EQUIPMENT**

- Fine-pole magnetic chuck, SKU: 253462
- Coolant system with magnetic separator and paper filter, SKU: 253459
  Parallel grinding wheel dresser, SKU: 253465
  Full housing with 2 doors, SKU: 253869

- Grinding wheel flange, SKU: 253987

# **KNUTH on YouTube** Information to the point

On our YouTube channel you can find videos for nearly all machines from our program. We show the machines from current deliveries and you get an impression of the handling, the processing quality and the machining performance.

Are you interested in a machine for which you cannot find a current video? Please feel free to contact us!
